 **About the Handling of Personal Information**

Organizer's projects ~ [Water solutions for industry (InterAqua)] X [Heat solutions (ENEX)]

Featured Theme

InterAqua  **Water** X **ENEX**  **Electricity**  **Gas**  **Heat**

Water Solutions for Industrial Users **Thermal Solution**

**For Your Water Demands and Solutions,
Find and meet face-to-face with your potential partners!**

InterAqua 2026 Industrial Water Treatment Solutions

At InterAqua, we will be holding a special exhibit called "Industrial Water Treatment Solutions," where you can see technologies and products related to solving water treatment issues in factories and facilities, recovering and reusing water resources, countering environmental risks, and saving energy and reducing energy costs.

[▶ View exhibitor information](#)

ENEX 2026 Thermal Solutions
Energy and Environment Exhibition

It is said that a total of 2 trillion kWh of unused heat is discharged into the environment as waste heat in the industrial and residential sectors each year. As one step towards achieving the goal of carbon neutrality by 2050, there are high hopes for efficient use of heat and effective use of renewable energy in all fields. ENEX, which will be held simultaneously with InterAqua, will exhibit a wide range of heat-related technologies, products, and solutions to address the actual and potential heat demand and issues in each field.

[▶ View exhibitor information](#)

InterAqua O 2026 Get up to speed on the latest trends in water quality PFAS countermeasures at the "PFAS Countermeasures Technology Consortium Pavilion"

At InterAqua, the PFAS Countermeasures Technology Consortium will set up a pavilion to address the urgent issue of PFAS countermeasures in water quality, with the aim of commercializing decomposition and environmental remediation technologies. This pavilion will enable participants to quickly grasp the latest trends in PFAS countermeasures in water quality in 2026.

Exhibition of water business supporting sustainable corporate activities

Addressing water shortages and environmental issues on a global scale has become an urgent issue in order to create a sustainable society. In addition, Japan is experiencing a full-scale population decline and the risks of abnormal weather and social change are emerging, and we are entering an era in which further efforts and fundamental revisions are required.

Corporate activities are no exception; corporate activities and management that incorporate perspectives such as a decarbonized society and response to SDGs are required.

InterAqua2026 will be held under the concept **Exhibition of water business supporting sustainable corporate activities,** covering not only innovative technologies but also examples that can be implemented right now.

This exhibition, now in its 17th year, will continue to grow together with you as a forum for solving water environment issues both at home and abroad, responding to the diversification and complexity of market needs. Please make use of this exhibition as a gateway to new business and a window for ongoing corporate activities.

Outline

Name	InterAqua 2026 17th Water Solutions Exhibition
Session period venue	Wednesday, January 28, 2026 - Friday, January 30, 2026 10:00-17:00 Exhibition held (Tokyo Big Sight South Halls 2 and 4)
Organizer	JTB Communication Design, Inc.
	Rainwater Storage and Infiltration Technology Association Kansai-Asia Environment and Energy Conservation Business Exchange Promotion Forum (TeamE-Kansai) Membrane Separation Technology Promotion Association Japan Association for Chemical Innovation Industrial Environmental Management Association Energy Conservation Center General Incorporated Foundation Japan Facility Management Association Japan Machinery Federation Japan Sewage Association, Public Interest Incorporated Association The Society of Materials Science, Japan Water Technology Research Center, Public Interest Incorporated Foundation National Building Maintenance Association Japan Chemical Fiber Association Japan Electronics and Information Technology Industry Association The Japan Institute of Energy Japan Industrial machinery Manufacturers Association Japan Society of Safety Engineers, a non-profit organization National Water Supply and Sewage Consultant Association (Public Interest Incorporated Association) National Water Utilization Facilities and Environmental Hygiene Association (Public Interest Incorporated Association) (in alphabetical order)
Exhibition scale	96 companies and organizations, 142 booths
Expected number of participants	47,000 people (including concurrent exhibitions)
Admission fee	Free (complete online registration required)

Theme/Exhibition target

theme

 Water Efficiency	 Effective Use of Water Resources and Energy
 High Functional Water	 Smart Water (Re)Cycle System
 Application of ICT/IoT for Water Management	 Water Environmental Risk and Sustainability

Global Water Business

Exhibit target

Materials/modules/components	Various water treatment membranes (RO, NF, UF, MF), ceramic membranes, ion exchange resins/membranes, various filter media, water purification agents, adsorbents (activated carbon, chelate resin, etc.), microorganism immobilization carriers, water treatment agents (coagulants, dehydrating agents, floating agents, heavy metal scavengers, disinfectants, cleaning agents, etc.), various sensors, LED devices for water sterilization, piping materials (pipes, fittings, couplings, valves, etc.), etc.
Equipment/equipment	Sewage and wastewater treatment equipment, sludge treatment equipment, solid-liquid separation equipment, oil-water separation equipment, evaporation and concentration equipment, water purification and water treatment equipment, (ultra) pure water production equipment, seawater desalination equipment, filtration equipment (membrane separation equipment, Microfiltration machines, rapid filtration equipment, filter presses, etc.), MBR units, ozone treatment equipment, ultraviolet (LED) sterilizers, ultrafine bubble diffusers, micro/nano bubble generators, pumps, blowers, wastewater recovery and reuse equipment, various measurement and analysis equipment, smart meters, etc.
system services	Water treatment engineering, water treatment maintenance services, ultrapure water supply services, recycled water supply services, groundwater and rainwater utilization services, remote monitoring and automatic control systems, data management and analysis solutions, automatic meter reading systems, IoT communication networks (LPWA, etc.), business Support solutions (asset management, wide area monitoring services, equipment maintenance software, etc.), analysis services, evaluation/consultation (water risks, energy conservation, environmental measures, etc.), financial/investment planning support, etc.
Disaster prevention/environmental measures/ Energy saving/energy creation	Disaster countermeasure filtration equipment, public health countermeasure equipment (manhole toilets, etc.), emergency power supplies, rainwater utilization and storage systems, green infrastructure, emergency flood countermeasure technology, water radioactive material countermeasures, energy recovery and utilization systems, heat exchangers and drainage Heat recovery equipment, power generation pumps, micro hydroelectric power generation, biogas power generation, biomass power generation/heat utilization, etc.

Target audience

Corporate Users / Public Agencies Organizations and Municipalities	Electronic Power / Energy	Equipment, Facility, System
Private users of manufacturing industries and facilities	Plants & Engineering / Construction / Consultants	Information & Communication Technology
Raw materials, industrial materials, water chemicals	Trading Firms & Agencies	University, Research

Venue configuration: Tokyo Big Sight

13 simultaneous exhibitions accelerating collaboration across industries and fields

Concurrent Events

(Optional) Package Booth

Includes:	
Display Cabinet with Sliding Doors x 2	
Reception Counter	
Fascia Board 3m	
Name Plate	
Folding Chair x 2	
Brochure Stand	
Name Card Box	
Arm Spot Light (100W) x 3	
Carpet	
Electric Supply 1kW	
Power Socket	
Trash Can	

Plans start from	¥ 176,000(tax included)
-------------------------	-------------------------

*Application for Package Booths starts October 2025.

Application method/Application deadline

Booth locations will be determined in the order of application, taking into consideration the number of booths available. If multiple applications are received on the same day, the applicant with the earliest application time will be given priority.

Please [apply online](#).

*The exhibition contract will be concluded at the time the organizer receives the application. Furthermore, if an exhibitor has made a provisional application, the application will automatically be converted to a permanent application as of June 1st unless the applicant cancels the application by the expiration date of May 31st. If the applicant cancels the application after June 1st at their own discretion, they will be subject to the cancellation fee set out in Article 13 of the Terms and Conditions.

*Please note that in the event of multiple applications on the same day, priority will be given to exhibitors who apply early.

*Even if it is before the application deadline, the application will be closed as soon as the planned number of booths is filled, so please apply as soon as possible.

Cancellation of exhibition application

As a general rule, cancellations cannot be made after this application procedure has been completed.

However, if the secretariat determines that it is unavoidable, we will approve the cancellation and ask you to pay the cancellation fee according to the following criteria.

Written notice of cancellation Based on the date of receipt	Cancellation fee rate
Until May 31, 2026 (Sun)	0% of bill amount
June 1st (Monday) - July 31st (Friday), 2026	50% of billed amount
After Saturday, August 1, 2026	100% of billed amount

Schedule until the event

September 2026	Exhibitor briefing session (planned)
November 2026	Deadline for various submission documents
Monday, December 14th and Tuesday, December 15th, 2026	Delivery/setup
Wednesday, December 16th – Friday, December 18th, 2026	Exhibition held (same day removal on the last day)

Visitor Guidance

This exhibition is **"Pre-registration required"**.

We kindly ask all attendees to pre-register before visiting the venue to facilitate seamless and contactless access upon entry and exit.

1 Visitor registration (free of charge)

Please **register as a visitor**,
My page will be issued.

Click here to register to
visit →

2 Visitor Badge Download

Please log in to My Page and
download the **visitor badge**
(PDF).

Click here to log in →

3 Print and bring your visitor's badge to Venue

Be sure to print out a copy
and bring it to the venue, QR
will be confirmed at the
venue.

4 Please bring used clear holders from your office to the venue. Please bring your used clear holders to the venue!

At the exhibition, we will hold an environmentally friendly project in collaboration with ASKUL Resource Recycling Platform.
Please bring your used clear holders with you when you visit the exhibition site.
After collection, they will be turned into recycled pellets and reborn as a new product.

	TCT Japan 2025, MEMS SENSING & NETWORK SYSTEM 2025		
Exhibition scale	102 companies, 130 booths		
The number of visitors	Final number of participants *including online participants: 52,470		
	*Number of visitors to Tokyo Big Sight		
	event date	weather	The number of visitors (Total of concurrently held exhibitions)
	January 29 (Wednesday)		12,396 people
	January 30 (Thursday)		14,241 people
	January 31 (Friday)		15,452 people
	3 days total		42,089 people

Concurrently held seminar "Aqua Week" Venue: East Hall 2, Aqua Stage

During the event, a seminar on water business was held at the Aqua Stage in East Hall 2.

1/29 (water)	10:30~ 12:00	<u>Living in an era of declining population: Taking on local issues from the perspective of water</u>
	13:00~ 14:30	<u>Taking on the challenge of innovative seawater desalination - Liquid metal technology and small, distributed equipment pave the way for the future of water resources -</u>
	14:45~ 16:15	<u>Sustainable water quality and risk management through sensing technology and digital transformation</u>
1/30 (tree)	10:30~ 12:00	<u>Trends in PFAS regulations for water purification and wastewater treatment and response strategies</u>
	12:15~ 13:00	<u>ROHM's thoughts on environmental contributions and the importance of water resources</u>
	13:30~ 16:30	<u>Future Living and Water Science Research Society Public Symposium</u>
1/31 (gold)	10:30~ 12:00	<u>Creating a sustainable society: Water resource value and new challenges in CSV management</u>
	12:30~ 13:15	<u>Trends in PFAS regulations for water purification and wastewater treatment and response strategies</u>
	13:25~ 14:25	<u>Factory wastewater seminar</u>
	14:30~ 16:00	<u>Public-private partnership to connect to the next generation: New technology development and excess sludge treatment efforts</u>

Exhibitor Presentation Venue: East Hall 1, Stage C

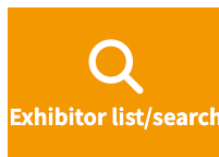

1/29 (water)	11:55~12:25	<u>Removal of trace contaminants including PFAS using a newly developed hollow fiber NF membrane</u>
	14:25~14:55	<u>Introducing an ammonia removal solution using 3M™ Liqui-Cel™ membrane modules</u>
1/30 (tree)	11:05~11:35	<u>WEF Active Oxygen is a Game Changer for Water Treatment</u>
	11:55~12:25	<u>PFAS purification properties of Triporous™, a porous carbon material derived from rice husks</u>
	13:35~ 14:05	<u>Wastewater treatment blowers Contribute to energy saving, maintenance saving and low noise</u> <u>New IoT-connected technology: Cloud monitoring and machine learning support the stable operation of wastewater treatment plants</u>
1/31 (gold)	15:15~15:45	<u>Water environment conservation project using domestically produced aquatic weed removal boats</u>

Co-hosted seminar "Aqua Week"

1/31 (water)	10:30~12:00	The future after water administration transfer - Aiming for a sustainable local community 50 years from now	Stage A
	12:20~13:05	Introducing examples of initiatives focused on technology, research, and diagnosis related to water quality management at AIST	Stage D
	13:30~16:30	Future Lifestyle and Water Science Research Group Public Symposium ~Water treatment, sensing, and nanoscience that will support future life~	Stage D
	15:30~16:50	Stable operation and equipment maintenance of wastewater treatment realized by IoT and cloud monitoring	Stage C
2/1 (wood)	10:30~12:00	Contributing to environmental improvement and efficiency through innovation and technology - Future possibilities of water business -	Stage C
	13:20~14:05	Contributing to a recycling-oriented society and reducing global environmental impact through new materials ~ Application to adsorption technology and water purification ~	Stage D
	15:15~16:45	Taking on the challenge of energy conservation and global warming countermeasures through the development of new sewage technology and wastewater treatment ~Public-private efforts to create the future~	Stage C
2/2 (Money)	10:30~11:30	The latest environmental solutions that support a sustainable society	Stage D
	12:30~13:45	Water infrastructure challenges to prevent regional warming and address water disaster risks due to climate change	Stage A

Exhibitor Presentations

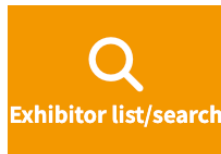

2/1 (wood)	12:30~13:00	Introducing solutions essential to promoting DX in the water business, from engineering to construction and maintenance of equipment and assets.	Stage C
	13:20~13:50	Team Water Shiga × A sustainable future led by water treatment technology ~Water environment business taken on by the Shiga Water Environmental Business Promotion Forum and member companies~	Stage C
2/2 (Money)	15:00~15:30	Water smart meter architecture for fully utilizing data from meter reading to beyond	Stage C

	3 days total		31,137 people

Co-hosted seminar "Aqua Week"

2/1 (Wed.)	Latest examples of DX that save labor and reduce costs in equipment management
	Water treatment technology evolving with deep ultraviolet light - Approaching a sustainable society using UV-LEDs -
2/2 (wood)	[Keynote Speech] Developing a society through sustainable water supply - Current and future of innovative water treatment technology -
	Development of B-DASH project towards carbon neutrality
2/3 (Money)	<Exhibitor Presentation> Stanley Electric Co., Ltd. *No advance registration required
	The latest water treatment solution that is both carbon neutral and cost saving
2/3 (Money)	To increase corporate sustainability - Water treatment equipment evolving in the carbon neutral era and its effects -

Information for the Press and the Media

We require to the press and the media as followings:

- ① Wear the press pass at the venue
- **Press passes** can be picked up at the registration counter in press-centre and return it before leave the venue.
 - ② We recommend you that obtain permission with the exhibitors before shooting.
 - ③ Does not allowed to take any photos or movies during the Symposiums and Seminars. If you need to take, please ask organizers at the registration desk.
 - ④ If you would like to interview the organizer, please visit the **Secretary's Office**.
- * Please kindly share with or email us once article was published materials.

Press Center

A designated press centre in the exhibition hall for press kits from each exhibitor, a fully equipped workspace, and will be serving drinks and snacks

On the handling of personal information at InterAqua

JTB Communication Design, Inc., works to handle and protect personal information in accordance with the Act on the Protection of Personal Information, the JIS Q 15001 standard (concerning Personal Information Protection Management Systems), and the JTB Communication Design Personal Information Protection Policy, which is available at <https://www.jtbcom.co.jp/en/privacypolicy/>. Providing your personal information signifies your acceptance these terms.

Organizer: JTB Communication Design, Inc.

1.Organizer

Hirohisa Hasegawa, Director, JTB Communication Design, Inc. Trade Show Business Unit
Contact: 03-5657-0623 Email address: jcd-expo@jtbcom.co.jp

2.Purpose for which personal information is to be used

Collected personal information will be used to carry out procedures, send or provide information, by mailing, email blasts, or any other means, related to your exhibition at, and participation in, the exhibition, conference, and/or seminar.
It will also be used for related purposes, for example to provide information about other events with which the organizer is involved, industry information, and other information.

3.Provision of information to third parties

- If you permit the information on your attendee badge to be scanned at exhibitors' booths at the exhibition venue, your registered information will be provided to the operators of those booths.
- After registered visitor registration, access the exhibitor pages and download uploaded file or watch videos, Personal information will be provided to the exhibitors you accessed. Personal information provided to exhibitors may be used for sales, marketing, etc., and may be sent to you by e-mail, direct mail, etc. For information on the exhibitor's handling of personal information, please refer to each exhibitor's website.
- Collected personal information may also be provided to sponsors and corporate partners so that they can provide information about future events and other opportunities.
- If you participate in presentations or seminars, your registered information may be provided to instructors and staff involved with those programs.
- If the exhibition is being held at the same time as another exhibition and attendees are permitted to register to participate in multiple exhibitions at the same time, your registered information may be provided to the organizers of those other exhibitions.
- The name, department and e-mail address filled out in Applicant field of the Exhibitor Application Form will be automatically synchronized with the Business Matching System after the application is completed, Those are displayed in the "Search/Recommend List" in the system.

*Items of Personal Information to be Provided
Company name, department name, position, work address, telephone number of workplace, name, e-mail address, etc.
[List of Providers](#)

4.Outsourcing of information processing to third parties

Processing of collected personal information may be outsourced to third parties in order to facilitate the smooth operation of the exhibition, conference, seminar, and/or other event. All third parties to which processing of personal information is outsourced will be required to enter into a non-disclosure agreement to ensure appropriate handling of that information.

5.Making requests concerning your information

We will respond immediately in the event you request that we disclose, revise, augment, or delete your personal information, or that we notify you of the purposes for which it is being used, halt its use, erase it, or stop providing it to third parties. Please contact the Personal Information Manager listed above to make such a request.

6. Voluntary provision of personal information

You are free to provide, or not to provide, your personal information as you see fit. However, you may not be able to exhibit at, or participate in, InterAqua(including its exhibition, conference, seminars, etc.) if you fail to provide the required information.

7.Handling of personal information in a way that ensures individuals cannot be identified

Although we may use cookies and other means to study how you use our website, it is not possible to obtain personally identifiable information such as your name, address, phone number, or email address from this information.
In addition, personal information such as the customer's name, address, telephone number, and e-mail address obtained through input forms and business card exchanges, etc., and the usage status of the customer's site obtained using cookies will be linked to this exhibition. Personal information may be used for sales activities related to events such as meetings and seminars.
